### Florida Department of Health Updates New COVID-19 Cases, Announces Three New Deaths Related to COVID-19

*~1,147 positive cases in Florida Residents and 80 positive cases in non-Florida residents~*

**TALLAHASSEE** — To keep Florida residents and visitors safe, informed and aware about the status of the virus, The Florida Department of Health has launched a [COVID-19 dashboard](#) that will be updated twice daily. Today, as of 6 p.m., there are 1,227 total\*\* Florida cases. Data in released reports are provisional and subject to change. In this release, we are correcting the number of COVID-19 related deaths from information previously released on the COVID-19 dashboard.

Three people have died who tested positive for COVID-19 in Clay, Duval and Palm Beach counties.

New Florida cases include:

- 56 additional positive COVID-19 cases (51 Florida residents and 5 non-Florida residents) reported to the Florida Department of Health.
- There are currently 1,147 positive cases in Florida residents and 80 positive cases in non-Florida residents.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories are running tests as they receive swab samples from practitioners. Testing and reporting times vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#). The Joint Information Center for COVID-19 is working to provide the latest report from this evening.

Confirmed Cases in Florida Residents	1,147
