## Florida Department of Health Updates New COVID-19 Cases, Announces Fourteen Deaths Related to COVID-19, Evening Update *~7,495 positive cases in Florida residents and 278 positive cases in non-Florida residents~*

**TALLAHASSEE** —To keep Florida residents and visitors safe, informed and aware about the status of the virus, the Florida Department of Health has launched a [COVID-19 dashboard](#) that will be updated twice daily. Today, as of 6 p.m., there are 7,773 total\*\* Florida cases.

While Florida's testing has increased over the past week, the percent of those testing positive for COVID-19 overall is 11 percent. Of the 8,853 tests performed on March 31, there were 1,062 positive results, or 12 percent.

Fourteen people have died who tested positive for COVID-19 in Broward, Dade, Lee, Manatee and Palm Beach counties.

New Florida cases include:

- 819 additional positive COVID-19 cases (802 Florida residents and 17 non-Florida residents) reported to the Florida Department of Health.
- There are currently 7,495 positive cases in Florida residents and 278 positive cases in non-Florida residents.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories are running tests as they receive swab samples from practitioners. Testing and reporting times vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#).

Confirmed Cases in Florida Residents	7,495
Confirmed by DOH	1,051
