Lee County, Fla. — The Florida Department of Health in Lee County (DOH-Lee), in partnership with Lee County Medical Society, is hosting a community outreach clinic offering Tdap and Flu vaccines in Sanibel.

The Tdap vaccine is critical to preventing Tetanus, especially for those who may have sustained cuts, scratches, or wounds from cleaning up debris after the hurricane and those whose last booster was 10 or more years ago.

Both Tdap and Flu vaccines will be available at no charge on a first come, first served basis during the following outreach event.

Thursday, December 1, 2022

Sanibel Fire Department
2351 Palm Ridge Rd
Sanibel, FL 33957
From 10:00 a.m. – 1:00 p.m.

Tdap can be administered to individuals 11 years of age and older. Pregnant individuals may receive Tdap during their 27-36th week of pregnancy if they have not already received a dose during the current pregnancy.

Flu vaccine is recommended for anyone aged 6 months to 64 years. Individuals 65 years of age or older should consult with their PCP for a high dose flu shot for optimal protection. Minors must be accompanied by a parent or guardian.

Disaster recovery information is available on the [Florida Disaster](#) or on Lee County's [Hurricane Ian Response and Recovery](#) website.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.
